## Limit Switch

REL EX II 2D
REL EX II 3D

## APPLICATION

KIEPE limit switches of type REL EX are suited for use in materials handling equipment, conveying systems, loading plants and mixing equipment for bulk material in stationary equipment for limiting the path of moving machine parts and for limiting travel paths under harsh environmental conditions. The KIEPE limit switches Type REL EX are suited for use in explosive atmosphere with conductive dust, Group II, category 2 , in zone 21 and 22 (Type REL EX II 2D) or categorie 3, only in zone 22 (Type REL EX II 3D).

The Kiepe limit switch type REL EX complies with the ATEX Directive 94/9/EG and meets the safety objectives of the Low Voltage Directive 2006/95/EC. KIEPE limit switch Type REL EX features a robust cast iron housing and is equipped with 2 force-actuated changeover contacts with snap-action function with two adjustable trip points.

## Note:

The limit switch must only be used in electrical control circuits.

## FUNCTION

The limit switch operates, when the roller lever is deflected. The roller lever can be mounted at any angle on the serrated shaft in steps of $12^{\circ}$ and can be deflected in either direction of rotation up to maximally $75^{\circ}$. The operating angle can be adjusted by an adjustable cam for each switching element.

In addition to the safety shutdown is thereby also a pre-warningfeasible. The roller lever is spring-assisted and turns backautomatically after deflection.

Note:
Swicthing angles up to $15^{\circ}$ should be set at the factory.

## TECHNICAL DATA

| Designation |  | Limit switch Type REL EX ATEX-Version |
| :---: | :---: | :---: |
| Type of actuation |  | Bidirektional, by roller lever |
| Complies with |  | DIN EN 60204-1; DIN EN 60947-5-1; EN 620 |
| ATEX |  |  |
| Complies with ATEX Standard |  | DIN EN 60079-0; DIN EN 60079-31 Protection by enclosure „t" |
| Device group / category |  | II / 2D, 3D; flamable, conductive dust |
| ATEX-Identification |  |  |
| for Zone 21, 22 | REL EX II 2D | (Ex) \\| 2D Ext IIIC T $85^{\circ} \mathrm{CDbIP67}$ |
| for Zone 22 | REL EX II 3D | (x) II 3D Ext IIIC $785^{\circ} \mathrm{C}$ DC IP67 |
| ATEX-Certificate |  | EPS 12 ATEX 1479 X |
| Mechanics |  |  |
| Enclosure |  | Cast iron DD-paint yellow, RAL 1004 |
| Roller lever |  | Stainless steel, roller: brass; with serration |
| Mounting |  | 2 slotted holes for M10-Screws |
| Installation position |  | Horizontal, tilt angle up to about $30^{\circ}$ |
| Deflection of roller lever |  | Maximum +/-75 ${ }^{\circ}$ |
| Mechanical reliability |  | $>10,000$ actuations |
| Gross weight |  | 5.4 kg |
| Electrical system |  |  |
| Switching System |  | 2 changeover contacts (SPDT with snap action), cam operated positive-making switches; gold plated |
| Switching range |  | $5^{\circ} \ldots 15^{\circ}$ and $15^{\circ} \ldots 35^{\circ}$, adjustable (factory setting: $10^{\circ}$ each) |
| Cable entry |  | 2 Threaded holes $\mathrm{M} 25 \times 1,5$ with 2 x screw plug, 1 x cable gland (added) |
| Utilization category |  | AC-15: 230V; 1.5A DC-13: 60V; 0.5A DC-13: 24V; 2A |
| Connection cross section |  | $0.75 \mathrm{~mm}^{2}$ to $1.5 \mathrm{~mm}^{2}$ |
| Protective conductor connection |  | M4, Protection class I: Protective earthing |
| Rated insulation voltage $U_{i}$ |  | 250 V |
| Rated impulse withstand voltage $\mathrm{U}_{\text {imp }}$ |  | 2.5 kV , overvoltage category II, degree of pollution 3 |
| Conventional thermal current $I_{\text {th }}$ |  | 6 A |
| Contact reliability |  | 30,000 operations with $100 \% I_{\text {e }}$ |
| Ambient conditions |  |  |
| Permissible ambient temperature |  | $-25^{\circ} \mathrm{C} \ldots+60^{\circ} \mathrm{C}$ |
| Protection rating |  | IP65 and IP67 in accordance with EN 60529 |

SELECTION CHART

| Type | Area of application Explosive dust atmosphere | Contact configuration SPDT | Order number |
| :---: | :---: | :---: | :---: |
| REL EX 011 II 2D | occurs in normal operation occasionally | 2 | 92.096230 .606 |
| REL EX 011 II 3D | not occurs in normal operation or infrequently ad for a short time | 2 | 92.096521 .606 |
| Spare parts and accessories: |  |  |  |
| EX-Cable gland; M25 x 1.5; sealing area $\varnothing 11 \mathrm{~mm}$ to $\varnothing 16 \mathrm{~mm}$ |  |  | 113.52.01.20.01 |
| EX-Screw plug; M25 x 1.5 |  |  | 113.52.87.20.01 |
| Roller lever, stainless steel, roller: brass; with serration |  |  | 94.047137 .102 |

## Important advice!

The cable gland and screw plugs are carried out according to EC-Type Examination Certificate.
The use of other cable glands or screw plugs may void the divice operation approval!

## MOUNTING

The limit switch of Type REL EX $\mathbf{1}$ is fastened with two (2) M10 screws on the substructure. The roller of the actuating lever should be deflected by a $45^{\circ}$ ramp $\mathbf{3}$ of the moving machine part $\mathbf{2}$. The maximum switching angle of the roller lever (3) must not exceed whenever the part of the machine reached the limit position. The roller lever is a wear part and therefore exchangeable. It can be affixed in steps of $12^{\circ}$ on the serration shaft. Electrical connection is performed with the device open using the screwed cable gland included in the delivery, directly on the screw joints of the switching elements.

## Important advice!

For protection against electrostatic discharge REL EX is provided with conductive components and an external potential equalization connection, to which a minimum of $4 \mathrm{~mm}^{2}$ potential equalization cable must be connected directly to the system. All connections must be checked regularly in accordance with the operation instructions.
